immutable VEEAM AGENT @MOUNT10

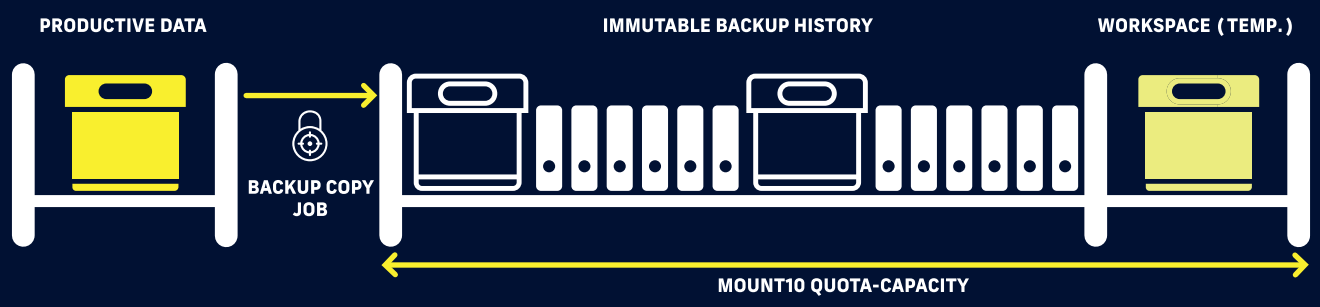
# DATA SHEET

Veeam Cloud Connect with deletion protection

## This is ImmutableVEEAM-AGENT@MOUNT10

*Immutable*VEEAM-AGENT@MOUNT10 is based on Veeam Cloud Connect. MOUNT10 ensures that data history of 7 or 30 days is always available and cannot be deleted or tampered with.

Veeam-Agent (Windows only) transfers the data automatically and pre-encrypted to SWISS FORT KNOX in a defined cycle.



## Functions and advantages

### 7- or 30-days deletion protection

A reserved volume is available to the customer. Depending on the situation, around 3 to 5 times the space of the original amount of data is required for deletion protection.

### SWISS FORT KNOX

The data is stored in encrypted form in the most secure data centre in Europe. The data is stored exclusively in Switzerland.

### Service Operation Center (SOC)

MOUNT10 checks the backup process daily and proactively creates logs in case of any anomalies. The SOC is always happy to answer questions 24/7.

### Rescue after ransomware attacks

Due to the deletion protection, cyber criminals cannot delete or manipulate data history of the last 7 or 30 days. This paves the way back to normality.

### End-to-end encryption

The data undergoes AES 256-bit encryption locally on the customer's infrastructure before being transferred. This means only the customer has access to the data.

### Encryption Key

The encryption key is used to encrypt the data. This way, only the owner of the key can access the data. If lost, the data cannot be recovered.
