

HOUSING

Factsheet

A safe place for your servers

This is HOUSING

SWISS FORT KNOX consists of two independent underground data centres, which are among the most secure IT infrastructures in Europe. The facilities are state-of-the-art, physically separated by 100 km and interconnected via high-performance networks. SWISS FORT KNOX is resistant to civil, terrorist and military risks.

Embedded in the depths of the Alpine massif and hermetically sealed, SWISS FORT KNOX is also protected against environmental risks such as earthquakes, flooding, landslides and wildfires. The redundant telecommunications and IT infrastructure of the SWISS FORT KNOX data centres represent the highest quality standards.

- Server-housing for companies headquartered in or outside of Switzerland

- The Datacenters fulfill the latest requirements

- FINMA Standards FINMA RS 23/01 (Outsourcing Banks)

- ISO 27001:2013

- BSI-Zertifizierung nach BS25999

- Environmental conditions as suggested by ASHRAE 34-2019 Standard at 24°C and rel. humidity between 45%-55%

- EMshield certificate zone 3 (BSI TL-03304) / zone 2 (NATO)

- The datacenters were purposely built around the security requirements of our customers

- 3rd party surveillance by camera and specially trained security employees

- All areas are equipped with multiple alarming systems

- Some of the systems are regular badge systems as well as biometrical access control systems and locks for individuals

- For emergency needs, we do offer dedicated secured workspaces on-site

- Direct access to international airfield with hangar (Jet Airplane landing possibility)

- State of the art office infrastructure

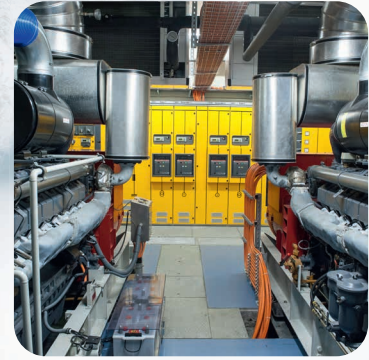

- Latest communication and IT-infrastructure

- Hotel rooms for guests and support staff

Key Facts

- ✓ Safest DC in Europe
- ✓ ISO 27001:2013
- ✓ Highly redundant
- ✓ Personal support

Feature Summary

Products

Secure Housing whole Racks (42HE) shared room
Secure Housing Private room
Secure Crypto Cold Storage

Details

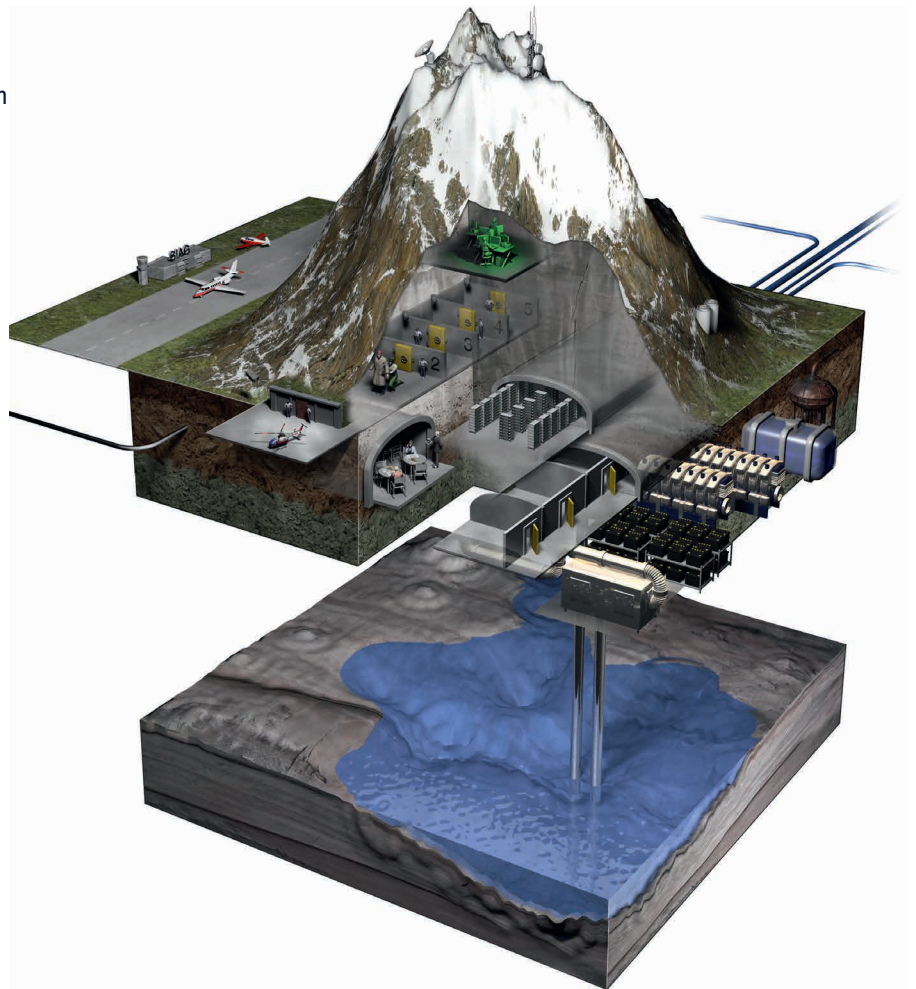

Redundant Power Connectivity
Onsite Installation Service
Redundant Backbone connections
Redundant UPS (N+1)
Redundant Dieselgenerators (N+1)
Redundant cooling systems
Own transformers in dedicated, secured room
Power consumption calculated by kwh
Fire surveillance system

Energy per Rack

n*16A 230V
n*32A 230V
n*32A 400V

Contract

Minimum duration (12 month)
Noticeperiod (3 month)

About SIAG Secure Infostore AG

SIAG Secure Infostore AG is a global provider of managed security services and is active in the field of risk and security consulting. With SWISS FORT KNOX, the highly secure data centres in the Swiss Alps, SIAG offers digital information protection against civil, terrorist and military threats. Proven security experts advise, integrate and operate high-quality security solutions with the necessary discretion.
