

COMBO

FACTSHEET

encrypted, daily monitored and fully automatic

This is COMBO

COMBO offers a highly efficient automation of data backup. The backup client on the client's infrastructure can be configured individually. The software automatically transmits the selected data to the SWISS FORT KNOX in the defined cycle and pre-encrypted.

The transmitted data is highly encrypted and cannot be overwritten or changed. COMBO offers a data history of 10 years or longer (unlimited data history). The history is included in the service.

HISTORY

Functions and advantages

SWISS FORT KNOX

The data is stored in encrypted form in the most secure data centre in Europe. The data is stored exclusively in Switzerland.

Recovery and disaster option

Data can be easily restored at any time using the software client. Data can optionally be delivered to the client using a physical medium.

Service Operation Center (SOC)

MOUNT10 checks the backup process daily and proactively reports irregularities. The SOC is at the client's disposal around the clock for any questions.

10 years of unchangeable data history

The data history is completely write-protected, and the month-end data is unchangeable. Longer storage is possible.

End-to-end encryption

The data is encrypted locally on the client's AES 256-bit infrastructure before the data is transferred. Only the clients have insight into their data.

Encryption Key

The encryption key is used to encrypt the data. Only the owner of the key can access the data. If lost, the data cannot be restored.
