

DATA SHEET

The object storage

This is S3@MOUNT10

The object storage ensures maximum availability of the backup data and fully complies with the AWS S3 standard.
The object storage is located in the SWISS FORT KNOX.

The data is saved to the reserved S3 area using the compatible backup application. Thanks to erasure coding, the data is available multiple times redundantly.

Functions and advantages

Erasure Coding

Erasure Coding is a technique in S3 storage that divides data into multiple segments and distributes them to different locations to increase fault tolerance.

SWISS FORT KNOX

The data is stored in encrypted form in the most secure data centre in Europe. The data is stored exclusively in Switzerland.

Simple price model

Simple and calculable costs (reserved storage space). No costs for upload, download, traffic or similar.

AWS S3 standard

S3@MOUNT10 complies with the AWS S3 standard and enables the integration of various backup systems.

Service Operation Center

The SOC is available to the customer 24/7 free of charge for support questions.

Encryption

Data must be encrypted by the customer before transmission. The data is encrypted in SWISS FORT KNOX «Data at Rest Encryption» (DARE).
