

DATA SHEET

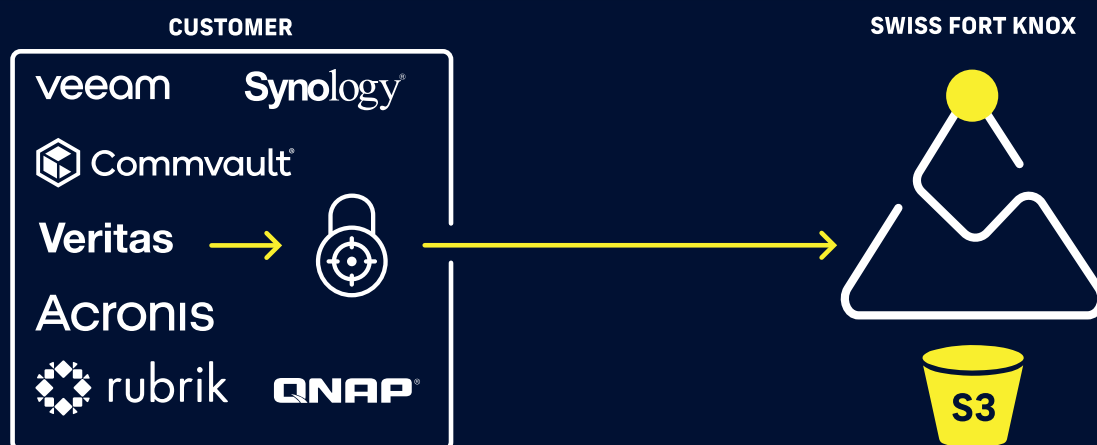

The object storage

This is S3pro@MOUNT10

The object storage ensures maximum availability of backup data and fully complies with the AWS S3 standard.

The object storage is located in SWISS FORT KNOX.

The data is saved to the reserved S3 area using the compatible backup application. Thanks to erasure coding, the data is available with multiple redundancies.

Functions and advantages

Erasure Coding

Erasure Coding is a technique in S3 storage that divides data into multiple segments and distributes them to different locations to increase fault tolerance.

SWISS FORT KNOX

The data is stored in encrypted form in the most secure data centre in Europe. The data is stored exclusively in Switzerland.

Simple pricing model

Simple and calculable costs (reserved storage space). No costs for upload, download, traffic or similar.

AWS S3 standard

S3pro@MOUNT10 complies with the AWS S3 standard and enables the integration of various backup systems.

Full flexibility

Dedicated management interface, conference and compliance mode and much more. With S3pro@MOUNT10 you have dedicated access to your own system and therefore full freedom and flexibility.

Encryption

Data must be encrypted by the customer before transmission. The data is encrypted in SWISS FORT KNOX «Data at Rest Encryption» (DARE).
