

DATA SHEET

10 years of data history included

This is SWISS DATA BACKUP

SWISS DATA BACKUP (SDB) is a brand of MOUNT10 AG. The grey label service is comparable to the standard MOUNT10 product COMBO.

However, it is a pure B2B offer. The fact that "POWERED BY MOUNT10" is visible in the client makes this offer so extraordinarily interesting. SDB offers the possibility to offer the most professional service to the end user at attractive conditions within the scope of the proprietary portfolio.

The sales partner purchases an SDB configuration (e.g. 500GB / 10 server licenses) and sells the contingent to the end users – on their own conditions.

Functions and advantages

SWISS FORT KNOX

The data is stored in encrypted form in the most secure data centre in Europe. The data is stored exclusively in Switzerland.

Recovery and disaster option

Data can be easily restored at any time using the software client. Data can optionally be delivered to the client using a physical medium.

Individual pricing

The contingent purchased can be resold under your own conditions.

10 years of unchangeable data history

The data history is completely write-protected, and the month-end data is unchangeable. Longer storage is possible.

Monitoring

The status of all backup accounts can be independently checked at any time with the Storage Platform console.

Integration into existing SLAs

The data backup can be integrated into existing SLAs. Thus, the end-user does not have to sign a MOUNT10 contract, which may deviate from the duration of the existing contracts.
